

## Invest in Seattle's energy future. Join Green Up!

# Green Up!

Enrolling in Seattle City Light's Green Up program takes only minutes, but will benefit the Northwest forever. Renewable energy generation preserves natural resources and reduces greenhouse-gas emissions to help create a clean and sustainable energy future.

Participating in Green Up gives you the opportunity to buy green power from new, local renewable energy generation projects such as geothermal, landfill gas and wind.

Green Up continues Seattle City Light's long tradition of delivering clean energy to its customer-owners. Your Green Up purchase of \$3, \$6 or \$12 per month covers the cost of Green-e Energy certified renewable energy credits generated in the Northwest.

Join today! Complete the form on the reverse side and enclose it with your City Light payment, visit [www.seattle.gov/greenup](http://www.seattle.gov/greenup) or call **206.684.3800**. [www.green-e.com](http://www.green-e.com).

### Seattle City Light

*Conserving Energy for a Sustainable Future*

**I want to Green Up my energy!**

☐ \$3 per month  
buys 200 kWh

☐ \$6 per month  
buys 400 kWh

☐ \$12 per month  
buys 800 kWh

☐ I already participate, but want to add \$\_\_\_\_\_ each month

**Your purchase of renewable energy credits (RECs) will appear on your regular bi-monthly utility bill.**
